COMMUNITY OF PRACTICE

Webinar Series for Trainers and Counsellors

Thursday, 15 October 2026
15:00 CET
Online via ZOOM

WEBINAR 2

Responsible AI in Adult Education: From Insights to Practical Guidance

Generative AI is increasingly shaping adult education, but many educators are still asking very practical questions: What can AI realistically support? Where are the risks? How can AI be used responsibly with learners who may have limited digital skills, low confidence or complex learning needs? This interactive Community of Practice workshop explores current insights on AI in adult education and connects them with the everyday needs of educators, trainers and job counsellors.

SPEAKER

Aria Askari

Trainer and project manager specialising in critical digital media literacy.

Aria has a background in German Philology, History, Political Science and Sociology, and experience in education, literacy development, media literacy and international project work.

AIM OF THE WEBINAR SERIES

To support adults with low educational attainment in navigating learning and career transitions.
